

June Notices from the Lazar Health Office

Hello,

It's June, and it's HOT outside! Please keep these few things in mind:

- **Please send your student in with a refillable container so they may have access to water all the time.** While our water stations are open, the water fountains are closed! For a while, we were giving out water bottles and our supply is now depleted. We are providing cups and Poland Spring water for students in our waiting room; however, our students work throughout the building and may not take the time to come down and help themselves. We want to make sure they stay hydrated!
- **Sunscreen applied before school is always a good idea.** Our students go out for PE if weather permits, and they are outside on hot, sunny days. (Please do not send it into school with them - they are not permitted to apply it or carry it themselves.)

Also:

If your student has had both of their Covid-19 vaccinations, please send us a copy of their card so we may update their medical records.

Please continue to fill out your student's Daily Health Screening through the end of the year.

Thank you!
